

## Make your own mini takeout box!

1. Print on card stock or heavy paper.
  - 1a. (optional) Draw something colourful on back of paper.
2. Cut along solid lines (including slot).
3. Score along dotted lines. (I usually use the back edge of an x-acto knife for this.) Fold side flaps around outside of box.
4. Punch a hole through overlapping side flaps and attach a handle. This can be made from wire, yarn or ribbon. If you'd rather not bother with a handle, just glue, tape, or staple side flaps to box.
5. Fold in non-interlocking top flaps, then the interlocking flaps. Done!
